**MEMORANDUM FOR:** Chief, Operations Branch, DPD**THROUGH :** Chief, Materiel Branch, DPD**SUBJECT :** Contract No. SE-510, Granger "Black Box" Spare Parts and Test Equipment

1. Attached is a copy of Granger's revised proposal to furnish five (5) Model 504B Repeater Jammers in lieu of the eight (8) originally authorized.

2. The Contractor included at our request its proposed price to modify the two Model 504A Units now in the field to the Model 504B Configuration. Also included is the price for seven (7) kits of spare parts. A detail list of these parts was not submitted, but is expected shortly. However, it is anticipated the list will be quite similar to the spare sets procured with the Model 504A Units. A copy of this list, identified as Appendix I to Contract No. SE-509, is attached.

3. Contractor also included its proposed price for furnishing the special test equipment shown on the list attached to the proposal. A set of equipment quite similar to this was procured under SE-509 to support the Model 504A Units. However, a good many of the items were furnished as GFP since they were already located in the Detachments. (Reference Memo for Director of Materiel, DPD-4048-59 dtd 17 June 1959). In view of the foregoing, it is requested the attached list be reviewed by the Materiel and Operations Branches for the possibility of the Government furnishing materials again.

4. The Contractor is presently operating under a letter contract. In order to definitize it in the near future, I would appreciate your comments on the request in Paragraph 3, above, as soon as possible. In addition, if you desire the modification of the two (2) Model 504A Units, a Program Approval will be necessary. However, it is to be noted that the total cost is within that previously approved under Program Approval CHAL-0737 dated 8 September 1959.
